

Defense Against the Dark Arts

- a look at digital privacy

KLA/MPLA 2018
Annual Conference

Expelliarmus!

Katlin Seagraves
Tulsa City-County Library
@iamliterate

Slides and notes are available at:
about.me/katlin

A young Harry Potter, wearing his Gryffindor robes and glasses, stands on the right side of the slide. He is holding a wand in his right hand and pointing it towards the bottom left. A red speech bubble originates from his wand tip, containing the text "Protego Horribilis!"

Protego
Horribilis!

Overview

- Privacy Threat Model
- Device/Account Security
- Passwords
- Tracking
- Further Learning
- BONUS: Privacy Settings on Social Media

We've got a lot to cover.

Privacy Threat Model

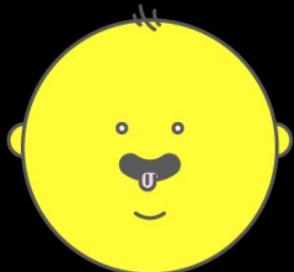

- What do you want to protect?
 - Email? Messages? Files?
- From whom do you want to protect it?
 - Hackers? Boss? NSA?
- How likely is it you'll need to protect it?
 - Are you storing state secrets?
- How bad are the consequences of failure?
- How much trouble are you willing to go through to prevent those?

Privacy Threat Model

**CHOOSE YOUR
SECURITY PROFILE**

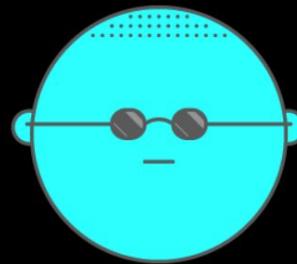

CIVILIAN

PUBLIC FIGURE

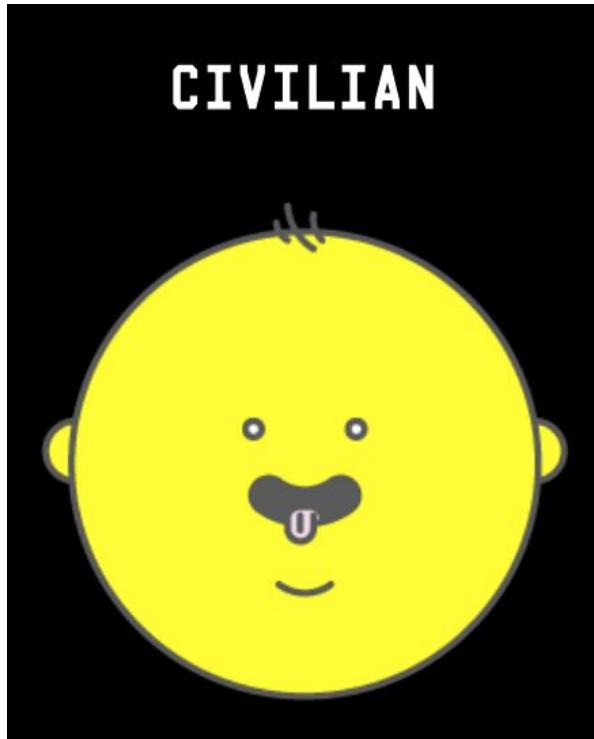

SPY

Lumos!

Privacy Threat Model: Average Consumer

- You want to protect consumer PII: bank accounts, browsing history, health data, location, etc.
- You want to protect it from: bad websites, hackers, data brokers, and social networks
- You are NOT a special target
- Identity Theft is your worst-case scenario
- Risk profile = average consumer

No matter your security profile,
there are a few steps
everyone should take.

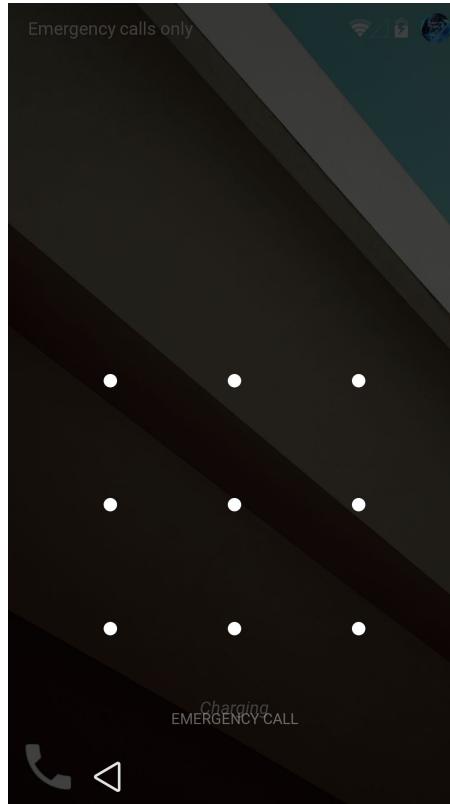

Step One: Secure your devices and accounts.

Muffliatto!

Device Security: lock screens

Banking, contact information,
personal communication, and
so much more!

Alohomora!

Device Security: updates

A screenshot of the Mac App Store interface. At the top, there are navigation buttons (red, yellow, green circles), a search bar with placeholder text "Search", and a menu bar with "Updates". Below the menu bar, there are five categories: "Featured" (star icon), "Top Charts" (chart icon), "Categories" (book icon), "Purchased" (tag icon), and "Updates" (refresh icon with a '1' notification). A message "1 Update Available" is displayed. On the left, there's a circular icon with a red 'X' and a blue checkmark. To its right, the text "Software Update" and "Restart Required" with a circular arrow icon. In the center, it says "Updates are available for your computer" and "Mac App Store Update for OS X El Capitan , Security Update 2018-004 10.11.6". To the right of this text are "More" and "UPDATE" buttons. At the bottom, a note states: "Use of this software is subject to the original Software License Agreement(s) that accompanied the software being updated."

Updates are a no-brainer way
to keep your devices safe.

Device Security: downloads

The image shows two side-by-side screenshots of mobile application stores. On the left is the Google Play Store interface, featuring a navigation bar at the top with icons for signal strength, battery level (55%), and time (09:09). Below this is a search bar with a magnifying glass icon. The main menu includes categories: APPS (selected), GAMES, and BOOKS. A section titled "New & Updated Games" displays three game icons: "Iron Desert" (a desert-themed racing game), "Cars: Fast as Lightning" (a Disney Pixar Cars game), and "New Words With Friends" (a word game with a large yellow 'W' icon). Below this is a "Recommended for You" section showing a skull icon and the text "BOGDAN-TUDOR". At the bottom of the screen is a navigation bar with tabs: Today, Games, Apps (selected), Updates, and Search. A yellow banner at the bottom right of the Play Store screen says "CLEVER". On the right is the Apple App Store interface, also with a top navigation bar showing signal strength, battery level (76%), and time (9:03 PM). The main title "Apps" is displayed above a "REDISCOVER THIS" section for "Amazon Prime Video" with the subtext "Catch up on the first season". Below this is a promotional image for "TOM CLANCY'S JACK RYAN" featuring John Krasinski. A list titled "12 Great Apps for iOS 12" follows, with the first two items being "CARROT Weather" (priced at \$4.99) and "Night Sky". The bottom of the screen features a navigation bar with tabs: Today, Games, Apps (selected), Updates, and Search.

Only download apps from your app store

Facebook: Privacy Checkup

The screenshot shows a Facebook News Feed with several posts. One post from a user named Katlin asks, "What's on your mind, Katlin?" Another post from a group called "Programming Librarian Interest Group" shares a link to "Programming Librarian Learning archives". This post includes a photo of a woman and text about joining librarians from Princeton Public Library and Phelps Community Memorial Library for tips on creating STEM programming. A third post from the same group discusses "Not Just for Kids: STEM Programs Your Adult Patrons Will Love" and mentions the Phelps (N.Y.) Community Memorial Library.

Teaching Tools: CERIAS

The screenshot shows the CERIAS website's K-12 section. At the top, there's a navigation bar with links for About, People, Partners, Seminars, News, Blog, Research, Symposium, and More. Below the navigation is a breadcrumb trail: Home > Education > K-12 > Teaching Resources > CERIAS - Lesson Plans / Presentation Handouts. The main content area features a large heading "CERIAS - Lesson Plans / Presentation Handouts". Below it, a section titled "Greetings, Teachers!" contains text about the importance of information security in classrooms. Another section discusses introducing information security topics to students. At the bottom, there's a call to action for the InfoSec Graduate Program.

CERIAS - Lesson Plans / Presentation Handouts

Greetings, Teachers!

Information Security is a serious topic that needs to be included in the curriculum of every classroom that uses a computer. It is important for teachers, administrators, and technology coordinators to be fluent on this topic in order to protect the integrity of school records, student information, and institution credibility. But, it is **EQUALLY** important that the students understand the basics of information security in order to protect themselves, their work, and school environment.

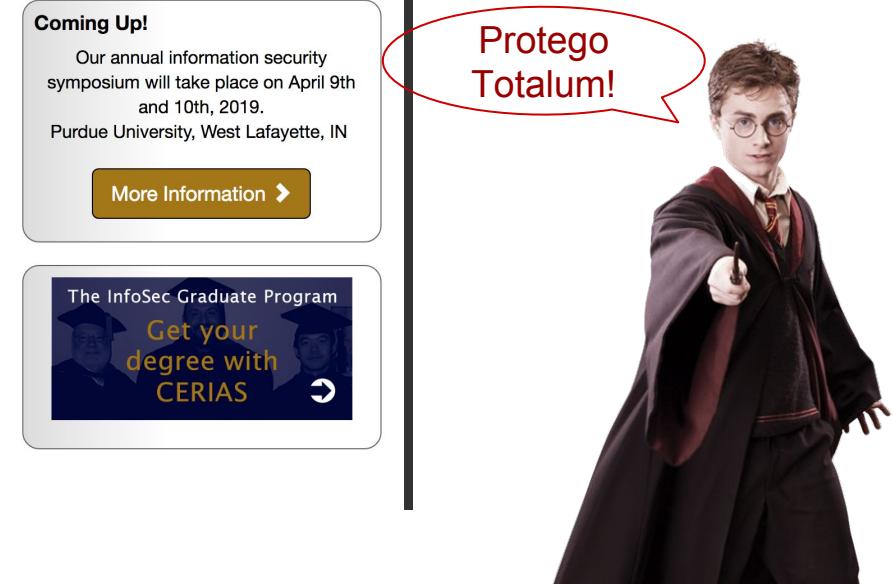

By introducing the topic of information security in your classroom, you will be helping your students to learn the skills that they will need to succeed in the 21st century. It is important to open a dialogue with the students and engage them in activities that present the principles of information security in a relevant and fun forum.

So, now that we all want to include information security as a topic in our classroom...How do we implement these ideas? The CERIAS K-12 Outreach Program understands that time is a critical and limited resource for teachers. Due to this, we are in the process of compiling a series of resources for teachers to use in their classrooms. The target audience for these materials is

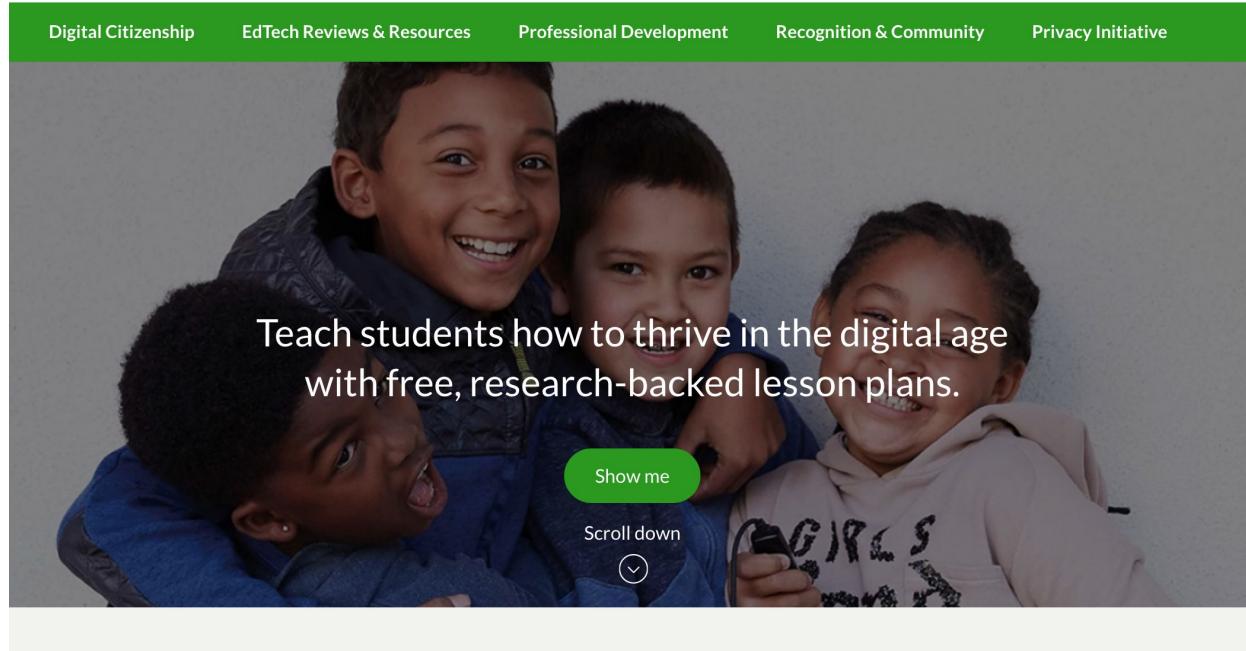

Coming Up!

Facebook: 2-Factor Authentication

The screenshot shows a Facebook event page for a "Digital Privacy & Security Workshop". The event details are as follows:

- Title:** Digital Privacy & Security Workshop
- Date:** Saturday, May 5 • 10 A.M.-3 P.M.
- Location:** Central Library, 400 Civic Center, Tulsa, Oklahoma 74103
- Organizer:** Techlahoma Foundation and Central Library
- Status:** Public • Hosted by Techlahoma Foundation and Central Library • 1 co-host pending

On the right side of the screen, a user's profile picture and name are visible, along with a "Home" button. A red arrow points from the "Settings" link in the dropdown menu to the "Settings" button on the event page. The dropdown menu also lists other options like "Boost Event", "Event Tips", "Report", "Your Page", "Business Manager", "Create Page", "Manage Pages", "Create Group", "New Groups", "Create Fundraiser", "Create Ads", "Manage Ads", "Activity Log", "News Feed Preferences", "Help", "Create", "event u", "add it to", "Settings", "Send Money", "Payment History", and "Log Out".

Facebook: 2-Factor Authentication

The screenshot shows the Facebook 'Security and Login' settings page. The left sidebar contains navigation links for General, Security and Login (which is selected), Privacy, Timeline and Tagging, Blocking, Language, Face Recognition, Notifications, Mobile, Public Posts, Apps and Websites, Ads, Payments, Support Inbox, and Videos.

Facebook: 2-Factor Authentication

The screenshot shows the Facebook login interface. At the top, there's a blue header bar with the Facebook logo, a search bar, and various navigation icons. Below the header, the URL 'Security and Login > Two-Factor Authentication' is visible. The main content area has a light gray background with a central circular icon containing a padlock and a key. Below this icon, the text 'Add Extra Security With Two-Factor Authentication' is displayed in bold. A subtitle underneath reads 'Add extra security to your account every time you log in on a phone or computer we don't recognize.' A 'Get Started' button is located in the center of the page. The bottom section is titled 'How Two-Factor Authentication Works' and contains two columns. The left column, titled 'Extra Protection', features a shield icon and text explaining that users will be asked for their password and a login code if an unusual login is detected. The right column, titled 'Through SMS or an Authentication App', features a smartphone icon and text explaining that a text message with a login code will be sent or an authentication app can be used.

Twitter: Account Privacy

The screenshot shows the Twitter account settings interface. At the top, there's a navigation bar with icons for Home, Moments, Notifications, and Messages, followed by a search bar. Below the navigation bar is a sidebar menu with links like Account, Privacy and safety, Password, Mobile, Email notifications, Notifications, Web notifications, Find friends, Muted accounts, Muted words, and Blocked accounts. The main content area is titled "Privacy and safety". It contains several sections with configuration options:

- Privacy**:
 - Tweet privacy**: A section with a radio button labeled "Protect your Tweets" (which is unselected) and a descriptive text about how it affects future tweets. A red arrow points to this section.
 - Tweet location**: A section with a checked checkbox for "Tweet with a location" and a descriptive text about adding locations to tweets. A "Delete location information" button is shown below it.
 - Photo tagging**: A section with three radio button options for photo tagging: "Allow anyone to tag you in photos", "Only allow people you follow to tag you in photos", and "Do not allow anyone to tag you in photos" (which is selected).
 - Discoverability**: A section with two checked checkboxes: "Let others find you by your email address" and "Let others find you by your phone number". Below it is a note about adding a phone number and connecting with people.

Twitter: Account Privacy

The image displays two Twitter profile cards for the same user account, `@iamliterate`. Both profiles feature a circular profile picture of a woman with glasses and a red lanyard, set against a city skyline and water background.

Left Profile (Public):

- Background: Blue
- Lock icon: Blue book icon
- Followers count: Redacted (red bar)
- Username: `@iamliterate`
- Profile Bio: Mathematician & Library Evangelist, Indie Bookseller, she/her
- Location: Oklahoma, USA
- Join Date: Joined October 2008

Right Profile (Private):

- Background: Blue
- Lock icon: Black padlock icon with a red arrow pointing to it
- Followers count: Redacted (red bar)
- Username: `@iamliterate`
- Profile Bio: Mathematician & Library Evangelist, Indie Bookseller, she/her
- Location: Oklahoma, USA
- Join Date: Joined October 2008

Twitter: Personalization & Data

The screenshot shows the Twitter mobile web interface. At the top, there's a navigation bar with icons for Home, Moments, Notifications, Messages, and a search bar labeled "Search Twitter". To the right of the search bar are profile icons for the user (@iamliterate) and a "Tweet" button.

The main content area is titled "Privacy and safety". On the left, there's a sidebar with a profile picture and the handle @iamliterate, followed by a list of settings options:

- Account
- Privacy and safety** (this option is selected, indicated by a red box)
- Password
- Mobile
- Email notifications
- Notifications
- Web notifications
- Find friends
- Muted accounts
- Muted words
- Blocked accounts
- Apps
- Widgets
- Your Twitter data
- Accessibility

The "Privacy and safety" section contains several configuration items:

- Tweet privacy**: Includes a checkbox for "Protect your Tweets" which is unchecked. A note says: "If selected, only those you approve will receive your Tweets. Your future Tweets will not be available publicly. Tweets posted previously may still be publicly visible in some places. Learn more."
- Tweet location**: Includes a checked checkbox for "Tweet with a location". A note says: "If selected, you can add a location to your Tweets, such as your city or precise location, from the web and via third-party applications. This setting does not affect Twitter for iOS or Android. Learn more." Below it is a "Delete location information" button.
- Photo tagging**: Includes three radio button options: "Allow anyone to tag you in photos" (unchecked), "Only allow people you follow to tag you in photos" (unchecked), and "Do not allow anyone to tag you in photos" (checked).
- Discoverability**: Includes two checked checkboxes: "Let others find you by your email address" and "Let others find you by your phone number". A note says: "This setting will take effect once you add a phone number. Add now. Learn more about how this data is used to connect you with people."
- Address book**: Includes a "Manage your contacts" button.
- Personalization and Data**: Includes a "Allow some" button with an edit icon (indicated by a red arrow). A note says: "Control how Twitter personalizes content and collects and shares certain data."

Twitter: Personalization & Data

The screenshot shows the Twitter 'Privacy and safety' settings page. At the top, there's a navigation bar with links for Home, Moments, Notifications, and Messages, along with a search bar. Below the navigation is a sidebar with a profile picture and the handle @iamliterate, followed by a list of settings categories: Account, Privacy and safety, Password, Mobile, Email notifications, Notifications, Web notifications, Find friends, Muted accounts, Muted words, Blocked accounts, Apps, Widgets, Your Twitter data, and Accessibility.

The main content area is titled 'Personalization and Data'. It explains that users can control how Twitter personalizes content and collects data. A 'Disable all' button is available at the top right of this section.

Personalization: This section contains several checkboxes:

- Personalize ads**: If selected, you will see interest-based ads on and off Twitter. [Learn more](#).
- Personalize based on your apps**: If selected, Twitter will view and store the apps on your devices to help show you more relevant content. Twitter won't see any data from within the apps. [Learn more](#).
- Personalize across all your devices**: If you disable this setting, Twitter will forget that you've used other devices. [Learn more](#).
- Personalize based on the places you've been**: Twitter always uses some information, like where you signed up and your current location, to help show you more relevant content. This setting lets Twitter personalize based on other places you've been. [Learn more](#).

Data: This section contains one checkbox:

- Track where you see Twitter content across the web**: Twitter uses this data to personalize your experience. This web browsing history will never be stored with your name, email, or phone number. [Learn more](#).

At the bottom right of the main content area is a 'Save changes' button.

At the very bottom of the page, there's a footer with links: © 2018 Twitter About Help Center Terms Privacy policy Cookies Ads info Brand Blog Status Apps Jobs Advertise Marketing Businesses Developers.
